EXAMINER'S AMENDMENT

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119 (a)-(d). It is noted, however receipt is not acknowledged of papers submitted under 35 U.S.C. 119(a)-(d). The foreign priority document had not been submitted.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, the line 4 of the claim, following "machine," [frame] has been replaced with –frames–

In claim 1, the line 10 of the claim, following "between the two," [guide tracks] has been replaced with –cambered elastomers –

In specification, the line 1 of page 5 of the specification, following "the" [two guide tracks] has been replaced with –two cambered elastomers. –

The aforementioned amendments to the claims have been made only to correct inconsistencies in the specification & to match the terminology of the specification & the claims.

3. The following is an examiner's statement of reasons for allowance: the allowability resides in the overall structure of the device as recited in independent claim 1, and at least in part, because claim 1 recites: "a first convex cambered elastomer," "a second convex cambered elastomer," "two windows being formed between the two cambered elastomers and a cambered plate having two hooks." The aforementioned limitations in combination with all remaining limitations of claims 1 are believed to render the claim and all claims dependent therefrom patentable over the art of record.

US 6882526 B2 to Neukam et al. is considered to be the closest reference to the present invention, disclosed (Fig. 4,5) a pair of plastic guide tracks (1) being attached to a cage of a computer, a plastic retaining rail to be attached on a side of the slide-in-unit, an ear (120), a plurality of tenons (not labeled, fig. 4), a window (14) but did not disclose a first convex cambered elastomer, a second convex cambered elastomer, a cambered plate and having two hooks or two windows being formed between the two cambered elastomers which is required by the independent claim 1 of the instant application.

The Examiner has cited the following pertinent to the present invention references:

US 2004/0075978 A1, US 6853549 B2, US 6442020 B1, US 6396686 B1, US 5142447, US 5262923, US 6590775 B2, US 6442031 B1, US 6388875 B1, US 6511139 B2, US 2005/0155050 A1 & US 6288902 B1 disclosed guide rails or tracks in computer casing configurations.

None of the cited references either alone or in combination is believed to render the present invention unpatentable as claimed.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ingrid Wright whose telephone number is (571) 272-8392. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on (571) 272-2800, ext 35. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
